

Introducing Climate Change: Past, Present, and Future

Activity 6: From my grandchild

Age: 8+

Aim:

To raise awareness that the impact of climate change will increase in the future.

You will need

Writing paper and pencils

What to do

Ask the children to imagine what life might be like in the UK in 50 years time if the climate continues to change. They need to think about it from the point of view of a grandparent with a grandchild of the age that they are now. Ask them to write a story or poem about what life might be like for their grandchild.
