

Climate Chaos

Day 1 Morning session: Gathering information about climate change

Activity 5: How do everyday actions contribute to climate change?

Time required: 20 minutes

You will need

- An interactive whiteboard, computer and internet access
- The two partially completed sheets of flipchart paper from the previous activity
- An additional sheet of flipchart paper

Aim

To revise what they have learnt from the previous activities and to explore in more detail how everyday activities contribute to the greenhouse effect and climate change.

What to do

[Play the two animations on Defra's Climate Challenge website](http://www.climatechallenge.gov.uk/multimedia/flashmovie.html) to the whole class.
<http://www.climatechallenge.gov.uk/multimedia/flashmovie.html>

Go back to the flipchart sheets from the first activity;

- Do they want to add anything about what they know?
- Has what they have seen answered any of their questions?
- Has it raised more questions they want to add?

Add anything they say to the appropriate flipchart.
